
Entry points (recipes and scripts)
Replication scripts (South Africa)
audit_sam.py --strict
build_sam.py --targets
Inputs
SUT workbooks (Stats SA layout)
TRE workbooks (ANSD, Senegal)
SAM workbook (Excel)
Eurostat JSON-stat (cached API responses)
SARB Quarterly Bulletin bulk files
Concordance CSV
SHA-256 manifest (sha256sum format)
edikit.data
sut reader F/R
repeated code raises (R); check_* return findings (F)
ansd reader F
check_tre returns findings
sam reader (Excel) R
repeated label raises
eurostat reader
kbp: SARB series R
missing observation raises
concordance R
duplicate source raises; validate lists gaps (F)
provenance R
verify_sources: missing or altered file raises
edikit.model
accounts R
classify_by_prefix: unmatched code raises
balancing R
ras, gras → every cell's factor; invalid seed or targets raise; non-convergence reported (F)
edikit.report
workbook: Excel sheets whose totals and balance checks are live formulas
edikit.pipeline
eurostat_sam F/R
fetch→generate→ balance→write_*; identity gaps, missing inputs, cross-source gaps, closing entry recorded (F); double counting raises (R)
audit F/R
CSV readers: repeated code raises (R); controls compared; unclassified accounts warned (F), or raise with strict (R)
reconcile
two producers' SAMs on a common macro grid
Outputs
Matrix CSV
Balanced CSV: every factor; closing and flipped cells noted
Markdown report: findings, closing entry, flips, GDP shift
Excel workbook (live formulas)
R stops execution: raises on failure
F records a finding and continues
